

Task 2 - Cache & Cookies, Browsers, Responsive Design

1. List down the latest browser versions for Chrome, Firefox, Chromium Edge and Safari.
 - a. Chrome: Version 115.0.5790.110 (Official Build) (64-bit)
 - b. Firefox: 115.0.3
 - c. Chromium Edge: Version 115.0.1901.188 (Official build) (64-bit)
 - d. Safari: 16.4.1

2. How to clear cookies and cache in chrome browser for -

a. All sites

1. Open Google Chrome on your computer.
2. Click on the three-dot menu icon in the top-right corner of the browser window.
3. From the dropdown menu, hover over "More tools."
4. In the expanded submenu, click on "Clear browsing data."

Alternatively, you can directly open the clear browsing data window by pressing the following keyboard shortcut:

Windows/Linux: Ctrl + Shift + Delete

Mac: Command + Shift + Delete

5. The "Clear browsing data" window will appear with various options.
6. Make sure the "Cookies and other site data" and "Cached images and files" options are checked. You may also

select other options if you want to clear additional data like browsing history or passwords.

7. Select the time range for which you want to clear the data. If you want to clear all data, choose "All time."
8. Click the "Clear data" button.

b. For any specific site

1. Open Google Chrome on your computer.
2. Go to the website for which you want to clear the cookies and cache.
3. Once you're on the specific site, right-click anywhere on the page to open the context menu.
4. From the context menu, click on "Inspect" or "Inspect Element." This will open the Chrome Developer Tools panel.

Alternatively, you can directly open the Developer Tools panel by pressing the following keyboard shortcut:

Windows/Linux: Ctrl + Shift + I

Mac: Command + Option + I

5. With the Developer Tools panel open, you should see a menu icon that looks like three vertical dots or three horizontal lines in the top-right corner of the panel. Click on it to open the menu.
6. In the menu, find and click on "More tools."
7. In the "More tools" submenu, click on "Clear site data."
8. A confirmation dialog will appear, asking if you want to clear all the storage for this site. This action will clear

cookies and other site data, including cache, for the specific website you're on.

9. Click the "Clear" button to proceed.

3. Perform analysis of the <https://www.makemytrip.com/> website for its responsive behavior and note down the resolutions on which it is not responsive.
 - a. MakeMyTrip website logo starts to squeeze down after 900px x 750px.
 - b. That's basically saying for mobile version website is unresponsive.
 - c. The Offer button is working as expected, it shows all offers that are available.
 - d. The login functionality is working. Both Google Sign-In and Mobile OTP verification are working.
 - e. For all the mobile versions, MakeMyTrip website becomes unresponsive i.e. you need scrolls for all the information on the website.
 - f. For tablets, the aspect ratio is perfect.
